Choosing the Right Back Support for You

Pelvic Obliquity and Scoliosis

Common Factors:

- Seat width too wide
- Sling upholstery (slackened / stretched)
- Armrests too low
- Lack of pelvic support under greater trochanters
- Asymmetrical pain, ATNR

Non-reducible Accommodate fixed deformity Reduce back / neck pain

- · Increase trunk stability and balance using 3-point force principle to support Maximize upper
- body function Increase comfort and
 - sitting tolerance · Promote skin integrity

 - Adjustable contouring to accommodate deformity
 - Angle adjustable optimize trunk stability
 - Appropriate height to enable placement of pads
 - in 3-point force configuration Depth adjustable -
 - improve lateral trunk stability if required
 - Breathability reduce perspiration
 - Soft foam overlay increased comfort

Solid Back Support
